This project will provide funding to purchase a Braille Printer and PC for the Turkey Eye Seeing Handicapped Library. The printer the organization currently has can print 500 books each month, but uses very expensive paper that is in limited supply. The new printer will use paper from a local distributor and will print 35% more books each month at a significantly lower cost. The PC will allow users to access recorded content via the internet and download audio books. The organization that will receive the printer and PC serves over 2000 blind primary and secondary students, in addition to the regional adult blind population.
